PROTECTION ► PREVENTION

EVENTER FRONT BOOT

NEW & IMPROVED

**MICRO FIBER BINDING
SMOOTHER MORE DURABLE LINING
IMPROVED SHAPE**

Front and back Polycarbonate Strike Protection Pad.

Coated Carbon Fiber: disperses the pressure evenly upon impact. Positioned at front and back of boot.

Aircooled Tendon Protection: allows air to circulate around the tendons.

Quick Wrap Around Secure Fastener.

CARBON FIBER STRIKE PROTECTION

AIR COOLING

SUPERIOR INJURY PREVENTION TECHNOLOGY

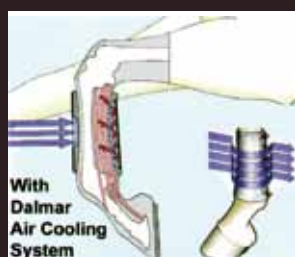

CARBON FIBER STRIKE PROTECTION

In the event of an accidental strike the force of the impact is distributed over the entire length of the boot and immediately deflected away from the horse's Flexor Tendons and Suspensory Ligament.

CARBON Fiber STRIKE PROTECTION only applies to the following boots. Dalmar Eventer Front, Dalmar Eventer Back, Dalmar Racing Front, Dalmar Show Jumping Open Front Tendon Boot, Dalmar Show Jumping Open Front Tendon Boot Lite Weight, Dalmar Overreach Boot.

AIR COOLING

Conventional boots and bandages insulate the horse's tendons and prevent heat escaping. The Dalmar patented cooling system utilizes the high speed cold air hitting the front of the horse's leg to pass through the boot and to cool the tendons while the horse gallops.

Air Cooling System only applies to the following boots. Dalmar Eventer Front, Dalmar Eventer Back, Dalmar Racing Front, Dalmar Show Jumping Open Front Tendon Boot Lite Weight.

Patent nos. gb 2407777, gb 2394666
